SUMMARY

Backend-focused software engineer leading the development team at Santa Labs, the innovation lab of a Brazilian hospital group. I design and ship healthcare products in production: central authentication, WhatsApp messaging, self-service kiosks, digital signatures, electronic health records, financial automation, data analytics dashboards and AI agents. End-to-end ownership of architecture, APIs, databases, integrations, infrastructure and CI/CD. Available as a contractor (B2B).

EXPERIENCE

Grupo Santa Casa de Franca — Santa Labs (Brazil)

Senior Software Engineer · Jun 2026 – Present
Full Stack Developer · Apr 2025 – Jun 2026

- Lead the development team behind a portfolio of 13 healthcare products, 9 of them in production.
- Designed the group's central authentication service (NestJS, PostgreSQL, Oracle): login integrated with the Tasy EHR and per-application, per-module permissions for every product.
- **SantaBot:** messaging platform on WhatsApp Business API and voice for appointment confirmations, campaigns, NPS and teleconsultations.
- **SantaAcesso:** self-service check-in kiosk, queue-calling displays and tablet app (NestJS, Electron, React Native/Expo), continuously deployed with GitHub Actions.
- **SantaSign:** e-signature for clinical documents.
- **SantaPag:** contracts and recurring billing integrated with the Getnet payment gateway.
- **SantaWorks:** financial automation and bank reconciliation.
- AI agents platform with LangGraph, FastAPI and a self-hosted LLM (Ollama/Qwen3), with RAG on PostgreSQL + pgvector.
- Defined the multi-cloud architecture (AWS ECS/RDS/S3/SQS, Cloudflare Pages, on-prem servers) and the CI/CD standard for all projects.

Lev Negócios (Brazil)

Software Developer · May 2024 – Apr 2025

- Built TypeScript and Python systems: REST APIs, RPA bots with Selenium, Puppeteer and Playwright, RabbitMQ queues, Docker and React front ends.

Data Mining Analyst · Jan 2023 – Apr 2024

- Built the production-data extraction that feeds the ERP for operations, finance and BI.

SKILLS

Backend: Node.js, TypeScript, NestJS, Python, FastAPI, REST APIs, WebSockets
Data: PostgreSQL, Oracle, Redis, RabbitMQ, SQS, pgvector, ETL
Integrations: Tasy EHR, WhatsApp Business API, Twilio, Getnet
Infra: Docker, Nginx, SSL/Certbot, GitHub Actions, AWS, Cloudflare, Vault, Prometheus, Grafana
Front end & mobile: React, Next.js, React Native/Expo, Electron
AI: LangGraph, RAG, Ollama, agentic development (Claude)

EDUCATION

B.S. in Information Technology — Univesp (Virtual University of the State of São Paulo) · expected 2027
Technical Degree in Business Administration — Etec · 2019

CERTIFICATIONS

Cambridge B2 First (FCE) · Lean Six Sigma Yellow Belt · Data Engineering Fundamentals · Government Cloud Services Administration · Python Essentials 1 · JavaScript Essentials 1
